# Martyn Farrows

Martyn Farrows is Chief Operating Office of SoapBox Labs, a speech technology company specializing in children's speech recognition and committed to children's data privacy and protection - the company's mission is to create the world's most accurate and accessible speech technology for children.  SoapBox Labs uses AI to generate applications of speech recognition that are suited to the learning needs of children, particularly in early childhood literacy, fluency, reading comprehension and language learning.

Martyn is a member of the Irish Government's Data Forum (since June 2015) and is an Advisor to TechIreland.  Previously, Martyn was Director of the Learnovate Centre, a strategic investment by the Irish government to establish Ireland as a global centre of excellence in learning innovation.  As a specialist in learning technologies, Martyn is an experienced public speaker, with a particular interest in data, privacy and assessment.
